**SPRING 1
ROUND UP**

The Greenhouse: A place for nurture

"When we welcome new students to The Greenhouse Hyflex Academy, we dedicate time to baselining students and assessing their readiness to learn. Baselining students after a period out of education is essential to accurately assess their current level of learning and identify any gaps in their knowledge or skills. This process helps us tailor our approach to meet each student's individual needs, ensuring they receive the support required to catch up and make progress. By establishing a clear starting point, we can monitor their development more effectively, track their achievements, and provide targeted interventions where necessary. "

"Over the past six weeks, The Greenhouse has experienced significant growth. As the first signs of spring begin to emerge, we look forward to building on the successes of this half term and continuing to support our students' personal and academic development."

Tara Jones - Head of Education

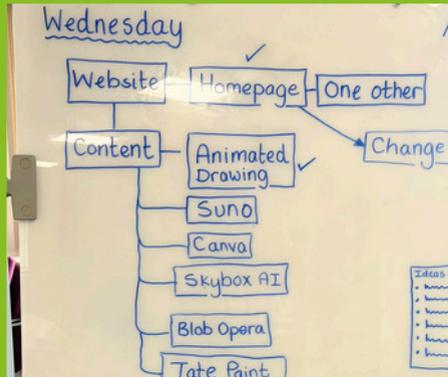

Digital Skills

We believe teaching digital skills is essential for preparing students for the future. In today's world, technology is not just a tool but a fundamental part of how we work, communicate, and learn. We have been equipping students with digital skills, empowering them to navigate and thrive in an increasingly digital landscape. Whether it's using technology for collaboration, problem-solving, or innovation, these skills are crucial for their success in higher education and the workplace. It's our responsibility to ensure they are confident, responsible, and capable digital citizens.

Movement & Wellbeing

Teaching movement and wellbeing is crucial for fostering a well-rounded, healthy generation of students. Our physical activities not only supports physical health but also enhances mental and emotional wellbeing. It helps students manage stress, improve focus, and build confidence. By integrating movement and wellbeing into our curriculum, we encourage lifelong habits of self-care and resilience, which are vital for navigating both academic challenges and personal growth.

This term we have had a focus on school trips and activities which play a vital role in the curriculum by offering students the opportunity to engage with learning in a more dynamic and hands-on way. They provide real-world experiences that complement classroom learning, helping students to make connections between theory and practice. Where possible, we link all activities to our workshops.

- Glow Up & Unwind: Self Care Spa Experience
- Wellbeing & Movement Hike/Walk up Moel Famau
- Team Building Games Day
- Education, History & Exploration Trip to Liverpool
- Climbing Wall – Building confidence and motivation
- Celebration Paint Party

*We plan for each half-term's activities after consultation with our students. **Pupil voice** is important and we provide a range of activities to ensure there is something for all.*

New for Spring 2

ASDAN Accredited challenges

Join **Nyarie Mtandiro for Essential Life Skills:** Cooking, Healthy Eating and Kitchen Hygiene for Young People in our new cooking school space.

"These workshops are essential because they equip young people with the practical skills, knowledge, and confidence they need to lead healthy, independent lives. By focusing on cooking, healthy eating, and kitchen hygiene, the program addresses key areas of personal development that are often overlooked in traditional education. The inclusion of All About Greens adds a professional dimension to the program, while the hands-on, interactive nature of the workshops ensures that learning is engaging and effective"

Nyarie Mtandiro Health & Wellbeing Lead

The launch of our Education & Employability Pathway with Emma Heaton

By incorporating employability skills into our curriculum, we ensure that students are not only academically prepared but also equipped with the practical abilities they need to thrive in a professional environment. These skills foster confidence, adaptability, and a strong work ethic, helping students transition smoothly into the workplace and excel in their chosen careers.

As we work with businesses to build partnerships we can offer more opportunities. Next half term we have students working locally in social care.
